

BDLS

Basic Disaster Life Support

**May 11, 2021
Lake Delton, Wisconsin**

BDLS® is a 7.5 hour competency-based, awareness-level course that introduces concepts and principles to prepare health professionals for the management of injuries and illnesses caused by disasters and public health emergencies. The primary focus of the BDLS course is incorporation of an “all-hazards” approach to mass casualty management and population-based care across a broad range of disasters. Measures to ensure and enhance health workforce readiness are emphasized throughout the course. This includes a consistent and scalable approach to workforce protection and casualty management, as well as, mass casualty triage and fatality management.

The overarching aim of the BDLS course is to teach clinical and public health management of all ages and populations affected by disasters and public health emergencies, through a standardized curriculum that is practical and relevant for all health professionals. The BDLS course is aimed at a broad range of audience categories that share a common likelihood of providing clinical care and assistance to casualties during a disaster or public health emergency, including healthcare, public health and allied health professionals; emergency medical services personnel; and other medical first responders and receivers.

Class is from 8:00am-4:30pm
